

SIGNA

365° *form*  
& FUNCTION

# ORAS SIGNA.

*Something new,*

# EVERY DAY.

---

**ORAS SIGNA** is an organically inspired faucet for a bathroom longing for beautiful design. It is available as both hybrid function and manually operated single-lever models for variable uses and purposes in everyday life. Oras Signa boasts an innovative 360-degree visual design, with a different look from every perspective, allowing you to fall in love with it over and over again, 365 days a year.

*Oras Signa is available with both classic single-lever and hybrid operation for variable uses and purposes in everyday life, while saving water and energy.*

# FORM & FUNCTION.

---

**COMBINING ORGANIC AND MULTI-DIMENSIONAL FORM,** Oras Signa surprises you from each angle, making your life more enjoyable through its aesthetics.

Oras Signa is not all about looks, though. Available in both classic and hybrid versions, its various features make your everyday life easier and more gratifying. The hybrid version can be operated manually, or alternatively using the touchless function for enhanced hygiene and convenience. The flexibly turning faucet head allows you a 150-degree operation radius.

**GERMAN  
DESIGN  
AWARD  
SPECIAL  
2016**

*Oras Signa 2213F washbasin faucet has been awarded with "The Special Mention Award 2016" of the German Design Award.*

# MORE REACH.

## *More options.*

---

**THE ORAS SIGNA HYBRID FUNCTION** version can be operated manually, or alternatively using the touchless function for enhanced hygiene and convenience. The flow of water can be activated by waving your hand beside the spout, and it automatically closes after six seconds. The flexibly turning faucet head allows you a 150-degree operation radius.

Both the hybrid function and the classic, single-lever washbasin faucet models are available with either a fixed spout or an integrated pull-out spout. In addition, both models are available with Bidetta hand shower.

*Both pull out spout and Smart Bidetta hand shower add an array of functions and practicality for maximized user convenience. Read more about Smart Bidetta on the next spread.*

# WIDER RANGE.

## *Versatile functions for your bathroom.*

---

The Smart Bidetta hand shower further enhances the range and options for the use of your water source. Equipped with a hose reaching up to 1,50 meters, the Smart Bidetta provides various possibilities for maximizing user comfort.

The Smart Bidetta hand shower is easy to operate: when lifting the hand shower from the holder, water starts to flow from the faucet. When pressing the hand shower trigger the water supply transfers from faucet to hand shower. The faucet closes automatically, when the Smart Bidetta hand shower is placed back to its holder.

*The Smart Bidetta is easy to use, and it enhances the options for the use of your water source – from personal hygiene to keeping your bathroom tidy.*

Oras no. 2207A Body part for touchless, concealed thermostatic washbasin faucet. Mains supply 230/12 V. Cover part no. 2207C is sold separately.

# BATHROOM INTELLIGENCE.

*Take a smart shower.*

---

It couldn't get any easier: just a single touch of the hand on the shower or head shower button and the water starts running. Another touch of the button, and the shower is off. The individual flow and temperature setting works just as easily. By rotating the on/off button, you get more or less water, whereas by turning the temperature control handle, you get warmer or cooler water.

The LED ring on the on/off buttons indicates how sustainable your showers really are. After 8 minutes the shower switches off automatically.

If the shower is turned off within 4 to 8 minutes, the shower will switch off without any warning, and the LED ring dims gently.

If the shower is switched off within the first 4 minutes, the LED ring flashes green three times, signaling ecologically sound shower behavior!
